PRE SERVICE REPORT

Leak check regulator: occy & pri swivel	Leak check AIR/BCD:	Hose check: ok
Vacuum check primary: ok	Vacuum check occy/AIR: leaking	Line pressure: 160
Mouthpiece primary: torn	Mouthpiece occy/AIR: torn	Computer Batteries:

Comments/Condition:

- The 1st stage line pressure was too high.
- The primary hose swivel was leaking.
- The occy was severely leaking air, & both the primary & occy mouth pieces were torn.
- The occy had a vacuum leak due to sand under the diaphragm.
- Otherwise the reg was in good overall condition.

POST SERVICE REPORT

Leak check regulator: ok	Leak check AIR/BCD:	Line pressure:
Vacuum check primary: ok	Vacuum check occy/AIR: ok	Stability: good
Cracking primary: 1 ¼"	Cracking octopus: 1 ½"	Cracking AIR:

1ST STAGE

- Stripped, cleaned & inspected.
- Serviced & lubricated.
- Line pressure reset.
- Replaced all O-rings.
- Replaced sintered filter.
- Replaced HP seat.
- Replaced diaphragm.
- Serviced balance chamber.

GAUGES

- Calibration of contents gauge checked. All OK.
